

Discover the **Dynamic and Static** **WAYFINDING** Solutions

A signage system is a useful tool for people who need to orient themselves inside and outside the buildings.

Why is it essential to have a good wayfinding system?

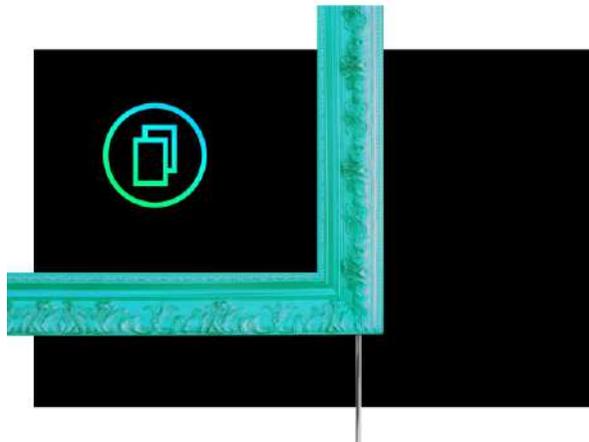

- 1 - to **quickly locate places and services;**
- 2 - to **support the architecture;**
- 3 - to **optimize travel times;**
- 4 - to immediately **identify entrances and exits;**
- 5 - to **ensure a digital and interactive experience for customers;**
- 6 - to develop a **guidance system that meets the needs of People with disabilities;**
- 7 - to **identify** the functions of the various **offices, premises, halls, bedrooms, etc.**

The Plus

Simple uploading of content

MEDIA CHROME® and **MEDIA TOTEM** offers immediate and dynamic options for uploading multimedia content. You can use the USB port simply by inserting the device into the panel or choose the LAN connection, in order to start the remote upload. Finally, in the version with NUC, with Windows operating system it is possible to connect all compatible devices to load the contents.

Accessories: Magnetic Frame

MEDIA CHROME® and **LED CHROME** products can be enriched with original colored or bright RGB frames, fixed with discreet magnets. **The COLOR FRAME** frames can be removed or replaced in a few moments, and are available in 2 versions: wood with a smooth or embellished surface and in an RGB luminous version.

Simple and quick message change

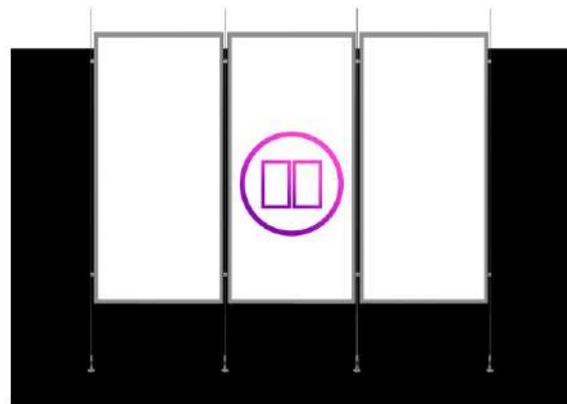

A transparent methacrylate sheet combined with a magnetic strip along the sides allows easy opening and guarantees hermetic closure. **By lifting the magnetic frame, the LED CHROME system allows a quick replacement of the poster: open, remove and replace.**

The Plus

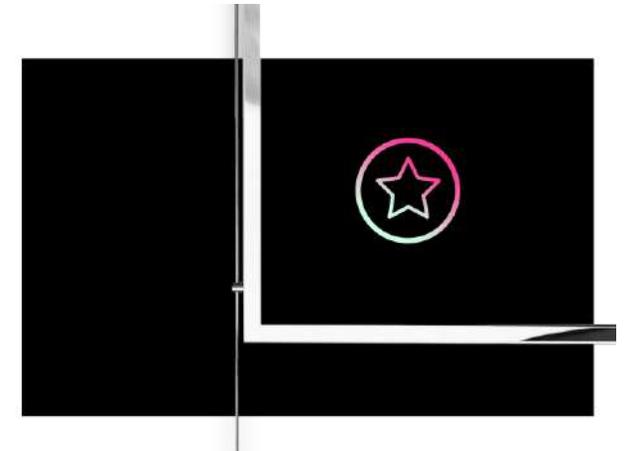

Solutions suspended on low voltage cables or stylus

MEDIA CHROME® and **LED CHROME** products are characterized by a **low voltage power supply, an additional guarantee of safety**. Their fixing on cables or stylus guarantees a light and dynamic design to the product, which can be installed anywhere, inside and in shop windows.

Componible systems to create compositions

LED CHROME with its unique characteristics, **allows you to create real compositions and sets**. Thanks to its system on cables and tensioners, it is possible to combine several panels, both vertically and horizontally, **creating highly visible compositions**.

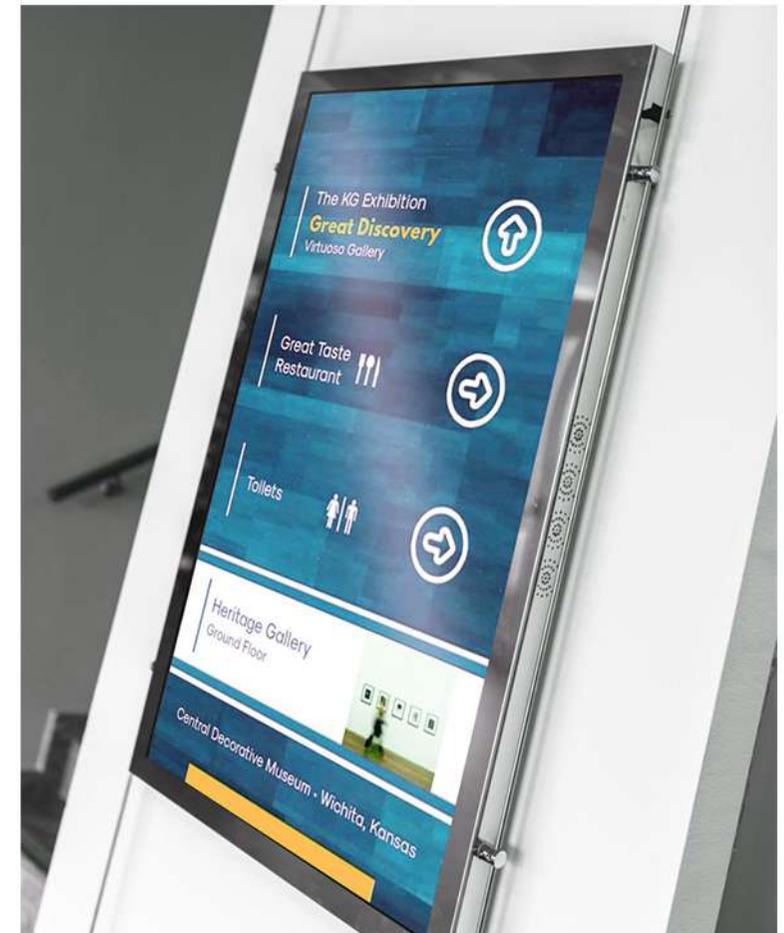

Modern and elegant design

The **dynamic and static FLEX solutions are designed specifically for your communication**. Elegant and discreet solutions that can be positioned in any environment, guaranteeing a remarkable visual impact. Our designers study how to make products more and more performing, resistant, aesthetically pleasing and flexible on a functional level.
